

PROJECT BASED LEARNING IN THE CLASSROOM: MAKE STUDENTS' LEARNING REAL AND EFFECTIVE

Roberta Xuereb

Katya Borg

Justine Ellul

Co-funded by
the European Union

STUDENTS NEED TO SOLVE REAL
PROBLEMS THAT CONNECT
TO A REAL CONTEXT.

Project Based Learning is a teaching method in which students gain knowledge and skills by working for an extended period of time to investigate and respond to an authentic, engaging and complex question, problem, or challenge.

J. Larmer,

Setting the Standard for Project Based Learning

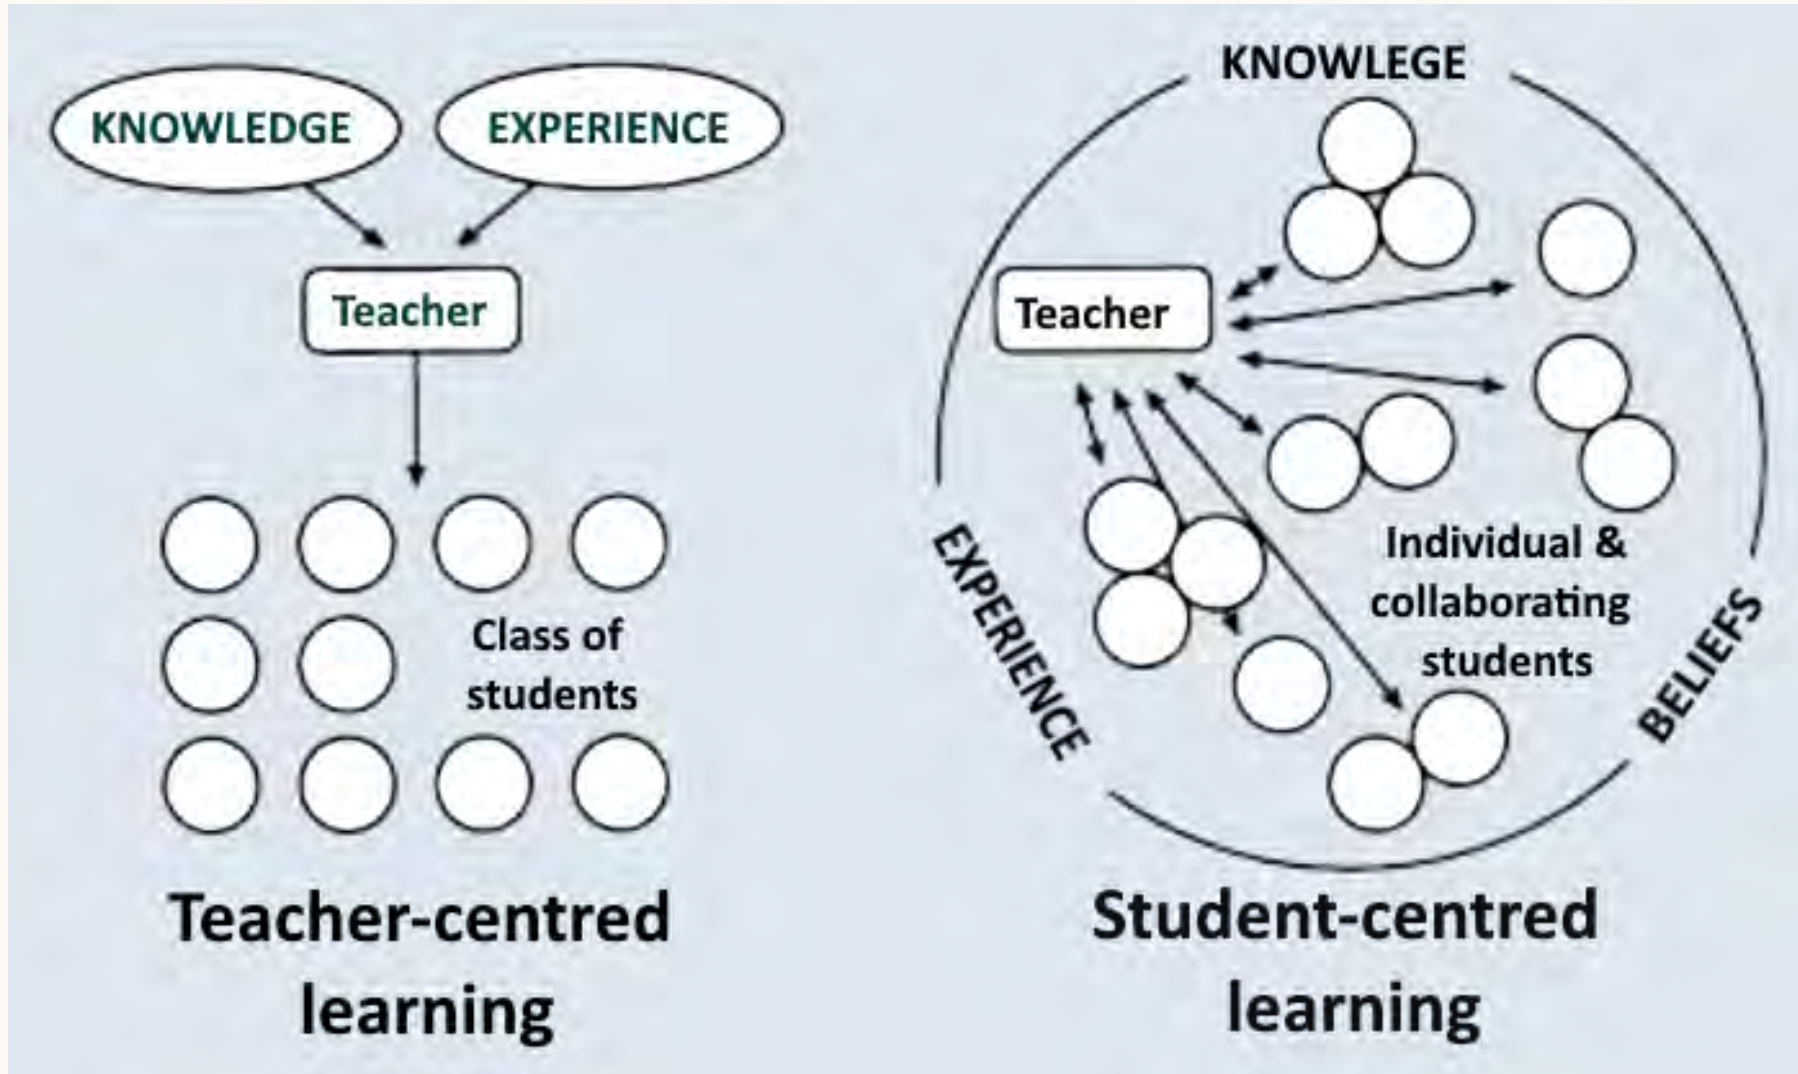

Co-funded by
the European Union

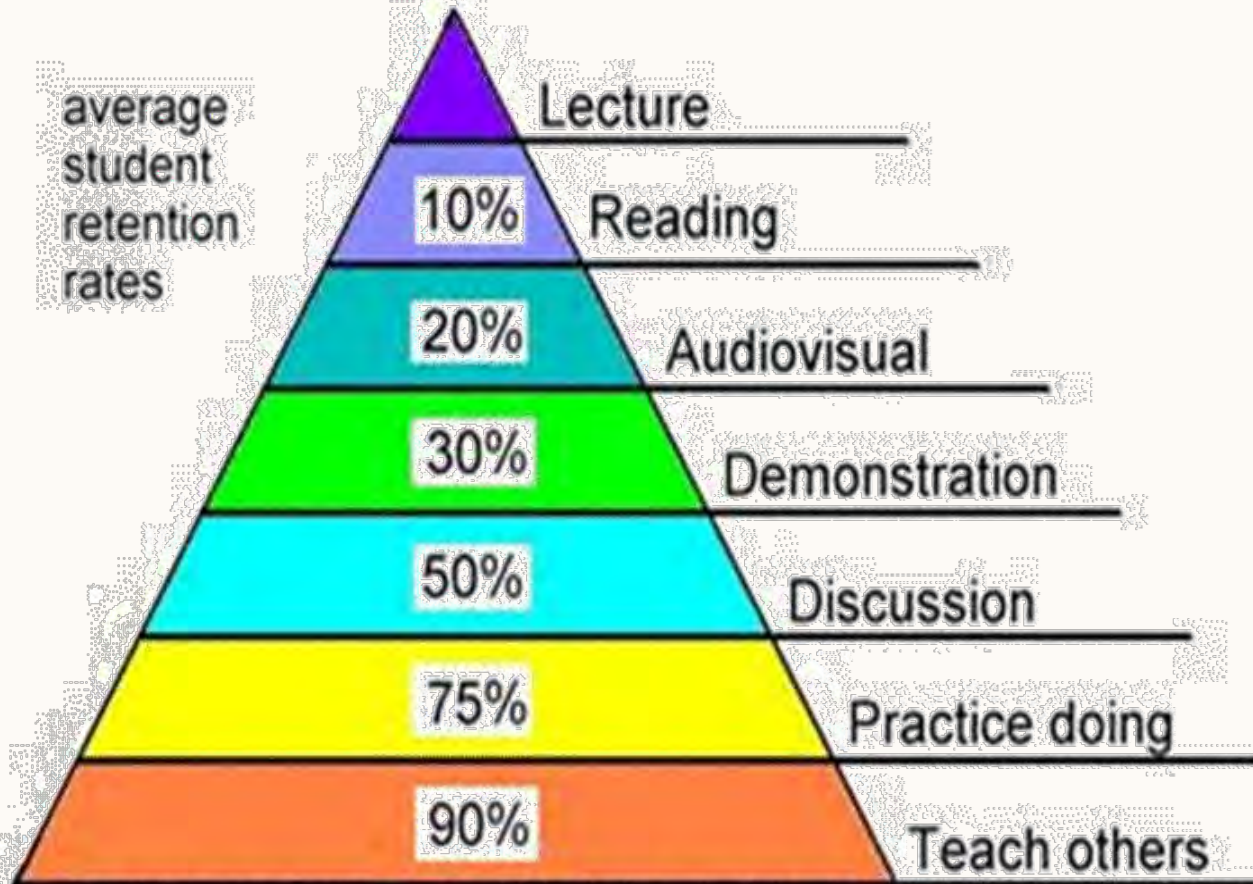

TEACHER- AND STUDENT-CENTERED LEARNING

ACTIVE LEARNING

Learning Pyramid

Source: National Training Laboratories, Bethel, Maine

Hard Skills

Teachable abilities or skill sets that are easy to quantify.

你好吗?

Proficiency in a foreign language

A degree or certificate

Typing speed

Machine operation

Computer programming

vs.

Soft Skills

Also known as "people skills" or "interpersonal skills."

Communication

Flexibility

Leadership

Teamwork

Time Management

VARAK LEARNING THEORY

Fleming came up with the idea for the Vark model while working as an inspector for the New Zealand education system.

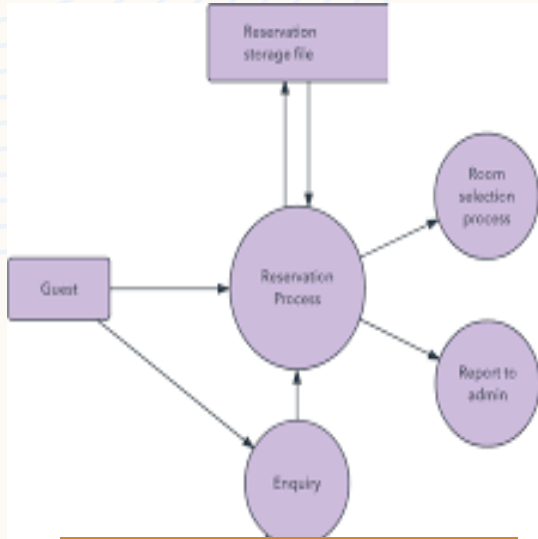

**“Everybody is a genius.
But if you judge a fish
by its ability to climb a
tree, it will live its
whole life believing
that it is stupid”.**

RESULTS 2.0 Teaching Every Student's Unique Learning Teaching Style

DID YOU KNOW??

Apparently...

- The least common single preference is Visual.
- About 70 % of the learners are multimodal.
- Prior to age 25 the database indicates that more people have a Kinesthetic preference.
- Men have more Kinesthetic responses and women more Read/write responses.
- Law students usually have larger proportions of Read/write than, say, nursing, where students are more likely to have Kinesthetic preferences.
- Graphic designers, performing arts and computer-systems students have a greater proportion of Visual preferences.

AND YOU? WHAT TYPE OF LEARNER ARE YOU?

[HTTP://VARK-LEARN.COM/THE-
VARK-QUESTIONNAIRE/TEACHING-
QUESTIONNAIRE/](http://vark-learn.com/the-vark-questionnaire/teaching-questionnaire/)

WE LIVE IN A WORLD WHERE WE NEED TO SOLVE PROBLEMS. THIS IS THE WAY WE NEED TO PRESENT EDUCATION TO OUR STUDENTS. TEACHERS MUST PUT STUDENTS ON A PATH THAT HELPS THEM BUILD KNOWLEDGE. THEY DO RESEARCH AND TOGETHER FIND A SOLUTION TO THE INQUIRY. THEREFORE, WITH PBL WE COMBINE KNOWLEDGE WITH RESEARCH.

IS IT A PROJECT OR IS IT PROJECT BASED LEARNING?

edutopia

PROJECTS

Can be done
alone

About the
product

Teacher-
directed

All projects
have the same
goal

Products are
submitted to
the teacher

Lack real-
world
relevance

Occur after the
“real” learning

PROJECT BASED LEARNING

Requires
collaboration
and teacher
guidance

About the
process

Student-directed

Students make
choices that
determine the
outcome

Products are
presented to an
authentic
audience

Based in real-
world
experiences or
problems

Real learning
occurs through
the project

TO SUM UP

Students have to solve a real-life problem

They do research and together find a solution to the inquiry.

They combine their knowledge with their research and with what they learn at school

Students present their solution to an audience

PBL PROS

1

The students take active part in their **learning process**.

2

They become **responsible** for their learning and acquire **autonomy**.

3

They learn to work in groups and **challenge** themselves in solving problems connected to their lives.

IN PBL...

The teacher is **Always** present! The teacher is a **Guide on Side**, that follows students' progress!

The teacher checks on and follows students learning and sources.

Real life Problems?

- + In this way students are more motivated; they see the point of their learning! They see that what they learn is connected to life, and not only to school!
- + A nice idea would be to ask them to find a solution to a problem of their community/school.

WHAT IS PBL?

- Interdisciplinary
- Challenging
- Connected to real-life
- Self-Directed

PBL combines the teaching of content (hard skills) with the developing of soft skills. It improves:

- Effective communication with a teammate
- Communication with your audience
- Collaboration, so that each person is contributing equally
- Use technology
- Creative-thinking: “think outside the box”
- Critical thinking

PROJECT BASED LEARNING IN STEPS

1. Entry Event

2. Introducing the Driving Question

3. Generating a List of Student Questions

4. Defining Major Products

5. Forming Student Teams

How to find ideas for PBL?

Issues in your school or community

Current events (locally, nationally, globally)

Real-world problems

Content standards

Your students' lives and interests

1. ENTRY EVENT

“An entry event is essentially the project kickoff. This is what you do to get students engaged in the PBL activity right off the bat.”

A. Smith, “Project Based Learning made simple”

Entry events

Dress up to match your theme

EU rising energy prices Illustration: Liu Rui/GT

2. INTRODUCING THE DRIVING QUESTION

WHAT MAKES A GOOD DRIVING QUESTION

Open-ended enough to allow individual investigation

Relevant to students

Meaningful to students

Support self-directed learning

Involves authentic problem-solving

Lends itself to cross disciplinary work and collaboration

A DRIVING QUESTION CAN BE...

Exploration of a philosophical question

- When do we grow up?
- Who has power and how do they get it?

An investigation of a historical event or time period

- Was it necessary to get Americans involved in the Vietnam war?
- What do we know about life in East Germany before unification?

A DRIVING QUESTION CAN BE...

A problem-solving situation

- How can we improve traffic flow in our city?
- What should we do about the cold lunches in our school cafeteria?

Examination of a controversial issue

- Should the population have access to handguns?
- Should Religion be taught in schools?
- Is war ever justified?

A DRIVING QUESTION CAN BE...

A challenge to design, create or produce something

- How can we create a mural that represents our community's past and present?
- How can we design a website to share our poetry with the world?
- How can we run a successful book club at our school?

The Driving Question

How can you design a statistical report of the cost of utility bills per household, in different EU countries, over the past two years?

PROJECT TITLE: UTILITY BILLS

**SUBJECT/LEVEL: SEAC MATHS
FORM 4**

TIME FRAME: 8 LESSONS

PBL SUMMARY

LEARNING OBJECTIVES

To be able to work out the total of a utility bill

To be able to find the mean, median, mode and range of ungrouped data

To be able to create frequency tables and organise data

To be able to draw graphical representations (bar charts, pie charts and line graphs)

KEY VOCABULARY

RATES

AVERAGE

RANGE

MEAN

MEDIAN

MODE

**BAR
CHART**

**PIE
CHART**

**LINE
GRAPH**

TARGETED SOFT SKILLS

READING INFORMATIONAL TEXT

PRESENTATION OF IDEAS WITH EVIDENCE

ENGAGE IN COLLOBORATIVE CONVERSATION

ANALYTICAL SKILLS

ICT SKILLS

What do we know?

3. GENERATING STUDENT QUESTIONS

What do we
need to know?

Key Student Questions

Why are these changes taking place?

What are the statistics of different EU countries?

What can be done to reduce the cost of utility bills?

RESEARCH

RALLY COACH

Key Student Questions

How are utility bills calculated in Malta?

What is a fixed charge?

What are the rates for electricity and water consumption?

How is the total cost of a utility bill calculated?

FILL IN A BLANK UTILITY BILL TO FIND THE TOTAL COST

**Teacher to provide
data sheets**

Key Student Questions

**What is the average cost of
the utility bill per
household, in a particular
EU country, over the last 2
years?**

MEAN

MEDIAN

MODE

**Which is the best
average to use? Why?**

**What is the range of
the cost of utility bills?**

**QUIZ ON KAHOOT
ABOUT AVERAGE
AND RANGE**

Key Student Questions

How would you present the findings of the statistical analysis?

Which graphical representations would you use?

QUIZ ON DIFFERENT TYPES OF GRAPHICAL REPRESENTATIONS

**BAR CHART
PIE CHART
LINE GRAPH**

Key Student Questions

Which software can be used to show your findings?

How can you effectively summarize all the information?

**TIMED PAIR SHARE
ABOUT THE
CONCLUSIONS OF
THEIR FINDINGS**

LEARNING JOURNAL

4. DEFINING MAJOR PRODUCTS

Major Products

Research about the change in the cost of electricity bills

Research about what can be done to save energy

Filling in a blank Utility Bill to find the total cost

Report about the Statistical Analysis of Utility Bills in different EU countries

EXAMPLES OF PRODUCTS

Assignment

Video

Blog

Website

Presentation

Public Product

**Presentation of the
Statistical Analysis
Report for the Audience**

**Intended Audience:
A person working at
the NSO**

5. FORMING STUDENT TEAMS

- Teacher decides
- Teacher decides, with student input
- Teacher manages process for students to decide

HELPING STUDENTS GET STARTED

LECTURES IN PBL

“Contrary to some stereotypes, there’s still room for lectures in PBL. During a project, the best way for students to learn something- once they see the genuine need to know it- might, in fact, be a lecture by a teacher.”

J. Larmer, Setting the Standard for Project Based Learning

Formative Assessment

Rally Coach

Think Pair Share

Timed Pair Share

Rally Robin, Round Robin

Learning Journal

RALLY COACH

SWITCH
&
REPEAT

RALLY COACH

- The teacher assigns an exercise.
- In pairs, one student solves the problem while talking through his thinking aloud.
- The other listens, coaches where necessary and provides positive feedback.
- Roles are then reversed.

THINK PAIR SHARE

- The teacher poses a problem;
- Students think alone for a specified amount of time;
- Pairs work together to discuss or solve the problem;
- Students are called on to share what their pair came up with the class.

THINK PAIR SHARE

If I have it, I don't share it.

If I share it, I don't have it.

What is it?

Timed Pair Share

In pairs, students share with a partner for a predetermined time while the partner listens. Then partners switch roles.

TIMED PAIR SHARE

- The teacher announces a topic and states how long each student will have to share;
- The teacher provides think time;
- In pairs, partner A shares their answer, partner B listens;
- Partner B responds with a positive statement;
- Students switch roles;
- Partner B shares their answer, partner A listens;
- Partner A responds with a positive statement.

Rally Robin

RALLY ROBIN

- The teacher poses a problem to which there are multiple possible responses or solutions.
- In pairs, participants take turns stating responses or solutions.

RoundRobin

ROUND ROBIN

- The teacher poses a problem to which there are multiple possible responses or solutions.
- In groups, participants take turns stating responses or solutions.

THE JIGSAW METHOD

JIGSAW

- The teacher presents a problem to be solved, a word to be spelled, a topic to be researched, parts of a chapter to be read, etc.
- Each student in each group has a specific responsibility, i.e., read pages 1-4, solve problem #3, etc.
 - Each student performs their role individually.
 - When each student has an answer they get together with the other students in each group who had similar roles, (Expert groups) and share their answers.
 - Students in each Expert group share their ideas (Rally Robin).
 - Students then return to their initial place.
